

# Income Opportunity For You

from

**E1KaD.com**

Thank you for your interest in our products. We specialize in products for Internet marketers, as you may have noticed, and hope you find value in what you just downloaded.

As an Internet marketer, I suspect you might be interested in improving your income. If that's the case, please consider joining our affiliate program.

## The affiliate program with a difference!

Our affiliate opportunity isn't quite what you may be used to. We use the Nanacast platform to track the traffic our affiliates send up, which gives several advantages:

1. **Multiple products** under the Nanacast umbrella means that if you send traffic to check out one offer, they're tagged with your affiliate ID for any and all products they purchase from us. The product you recommended, upsells, downsells, backend sales, even products that we come out with in the future that you never even heard of or promoted. So you could be getting sales for a long time with one referral, even sales of recurring products such as Earn1KaDay.
2. **Even if you send traffic to pick up one of our free reports**, that tags you for affiliate commissions in the future.
3. **No affiliate hijacking.** Nanacast won't allow an affiliate to purchase through his or her own link, so even if they try joining our affiliate program, then building their own link to purchase the product you referred them for, you'll still get credit. Compare that with Clickbank and other programs that allow such a practice. Many estimate that affiliate hijacking costs an affiliate 30% in commissions in the IM niche.
4. **You'll earn more.** With Nanacast, I pay you your commission without withholding any fees. You get the full amount paid to your PayPal account. No, there are no PayPal fees when you receive the money because of the way I send the payment, I pay the fees on both ends (receiving and sending).

5. **Affiliates get special offers** from time to time. When I come out with a new product, I'll often give a special discount to affiliates so that they can review it and hopefully recommend it to their list or online.

I'll attempt to get your referrals to not only join my email list, but also to join as an affiliate. Now normally that sounds like a bad deal for you, but consider this. When I make a recommendation to purchase a new product, and they buy, you get a commission. So you don't necessarily need to email them about our new products. Additionally, even if they become an affiliate, and they buy a new product, remember that Nanacast doesn't allow an affiliate to buy through their own link, so you're still tagged and will receive commissions for their purchases.

And remember, I make special offers to affiliates, so they are far more likely to make a purchase of more products. Yes, the lower cost offers yield lower commissions, for example instead of you getting a \$20 commission on a \$37 product, you might get a \$10 commission on a discounted \$17 product, but the fact is, we'll make more sales of that \$17 product than we will of the \$37 product.

**Bottom line is, I'm working on your behalf.** If you help me build my lists, I'll help you build your income.

**Sign up as an affiliate here:**

<http://www.e1kad.com/affiliates.html>

You can see the products that we currently have on our Nanacast platform here (I'm adding more products on a regular basis):

<http://www.e1kad.com>

And if you're interested in Nanacast itself, you can learn more about it here:

<http://www.nanacash.com>

That's an affiliate link, and I'll get a commission if you sign up for Nanacast through my link, but if you do, I'll help you get started, there are some things that aren't terribly well documented, and you might want to avoid all the aggravation I went through when I started.
